Profile

Energy and engineering graduate with experience across renewable energy origination, energy markets, data analysis and systematic trading. M.Sc. in Sustainable Energy Supply with a mechanical engineering background and an interest in the intersection of energy, markets, technology and data.

Core Skills

Software	Python (pandas, matplotlib, Jupyter), SQL, Excel, Power BI
Tools	PostgreSQL, Grafana, Git/GitHub, CRM systems
Languages	English (Fluent), German (C1), Thai (Native)
Energy	Origination, direct marketing, PPAs, solar, wind, BESS, flexibility

Work Experience

Origination – Intern / Working Student **09/2024 – Present**
Trianel GmbH, Aachen

- Prepared customer quotations for the direct marketing of decentralised renewable energy assets using internal pricing tools
- Managed customer communication and resolved technical and commercial inquiries related to plant data and operational topics
- Coordinated with Origination, Quantitative Analysis and Energy Data Management to review asset data and maintain consistent workflows
- Maintained CRM, customer and asset data and supported flexibility marketing and improvements to internal tools and processes

Independent Trader **10/2020 – 09/2022**
Self-directed, Chiang Mai, Thailand

- Developed and backtested systematic trading strategies focused on Thai equities using market and macroeconomic data

Workshop Intern – Chemistry, Mechanics & Technical Drawing **02/2017 – 05/2017**
Forschungszentrum Jülich, Jülich

- Nine-week practical internship covering chemical laboratory techniques, metal cutting operations and technical drawing

Education

Master of Science – Sustainable Energy Supply **10/2022 – 04/2026**
RWTH Aachen University, Aachen *Final grade: 2.0*

Bachelor of Engineering – Mechanical Engineering **10/2017 – 09/2020**
FH Aachen University of Applied Sciences, Jülich *Final grade: 2.1*

Focus: Energy Technology

A-Levels **07/2014 – 10/2016**
Varee International School, Thailand
