Profile

Energy market-focused graduate building my career in energy trading, energy analysis, and portfolio management. Motivated by energy markets, pricing, and the commercial side of the energy sector, with the willingness to learn quickly, take responsibility, and contribute to the energy transition.

WORK EXPERIENCE

Origination – Intern / Working Student

09/2024 – Present

Trianel GmbH, Aachen

- Managed client communication via phone and email, resolving technical and commercial inquiries (plant data, load profiles, commissioning, operational issues)
- Collaborated with Origination, Quantitative Analysis, and Energy Data Management to ensure consistent workflows and data integrity
- Prepared quotations using internal pricing tools for PV and wind energy products
- Maintained CRM systems ensuring data quality and accurate customer portfolio tracking
- Supported flexibility marketing and contributed to continuous tool and process improvements

Independent Trader

10/2020 – 09/2022

Self-directed, Chiang Mai, Thailand

- Developed a systematic trading approach, tracked Thai equity markets, analysed macroeconomic releases and backtested strategies

Workshop Intern – Chemistry, Mechanics & Technical Drawing

02/2017 – 05/2017

Forschungszentrum Jülich, Jülich

- Nine-week practical internship covering chemical laboratory techniques, metal cutting operations, and technical drawing standards
